Protecting What Matters Most

## Safety Programs

### Prescription Eyewear

#### SafeVision Prescription Eyewear Program

SafeVision from Hoya simplifies and manages prescription safety eyewear ordering. They can help turn a logistical challenge into a tangible benefit for your organization, saving you both time and money.

#### About

Regulations require employers to ensure that all employees have appropriate eye or face protection if they are exposed to potential hazards. General dress eyewear (streetwear or non-safety frames) does not meet the standards set forth by ANSI Standards for Safety Prescription Eyewear.

As the leading manufacturer of safety prescription eyewear, SafeVision continuously provides businesses with comprehensive eye protection products and programs. Their knowledge and experience are your best assets when creating or managing single or multi-location safety eyewear programs. Package pricing saves your organization on a comprehensive range of frame styles and lens treatment options.

#### Key Benefits

Programs can be tailored to meet the needs of your workforce and include:

- Prescription safety eyewear meets ANSI Z87.1 standards for high-impact resistance
- Professional dispensing provided by a nationwide network of eyecare providers
- Pentax safety frames with permanent or detachable side shields and carrying case
- Customized order form and unique web link for your business
- Comprehensive warranty and remake policy
